Casey McCabe

INDEPENDENT GAME DEVELOPER

SUMMARY

Independent game developer and college student focused on game systems design, rapid prototyping, and retro-inspired 3D modeling.

GAME DEVELOPMENT PROJECTS

InfiniRetail - Retail Management Simulation

Godot 4 | Solo Project | In Development

- Designing and developing an isometric retail management game featuring store construction, multi-store management, and customer and staff AI.
- Prototyped interconnected gameplay systems including grid-based building, employee and manager controls, a world map with purchasable locations, and an interactive in-game "operating system" for managing stores.

RUXELZ - Multiplayer Gaming Platform

Godot 4 | Solo Project | In Development

- Creating an online multiplayer gaming platform inspired by early Roblox with an emphasis on player created worlds.
- Developed and tested a functional multiplayer prototype featuring player accounts, a custom auto-updating launcher, website integration, and online gameplay with my own self-hosted dedicated servers.
- Currently designing and developing RUXELZ Studio, a custom game editor inspired by classic Roblox Studio, featuring 3D world building and integrated world publishing with scripting tools currently in development.

EXPERIENCE

RECEIVER / STOCKER / CASHIER — 2021 – Present

Society of St. Vincent de Paul - Fenton, MO

- Supports daily retail operations through processing donations, cashiering, customer service, and teamwork.

EDUCATION

ASSOCIATE OF ARTS - IN PROGRESS — 2025 – Present

St. Louis Community College

- Pursuing general education whilst working full time, alongside independently studying game development.

TECHNICAL SKILLS

Engines:

- Godot
- Unity

Programming:

- GDScript
- C# (Basic)

Tools & Workflow:

- Linux
- Blender
- Version Control (Git / GitHub)
- Docker
- Nakama

Game Development:

- Game Systems Design
- Rapid Prototyping
- 3D Modeling
- NPC AI Design
- Multiplayer Prototyping
- UI/UX Design
